ACCUSCORE NCAA TOURNAMENT CHEAT SHEET

AccuScore's College Basketball Simulator has simulated every possible Tournament Match-up (nearly 500 different match-ups), even the #1 Seed in the East playing the #16 Seed in the West. We use these match-up probabilities to simulate the entire NCAA Tournament 100,000 times. We analyze the most important findings from our simulations along with our proprietary analysis of each tournament team to provide you with what you need to WIN YOUR BRACKET!

ROUND-BY-ROUND PROBABILITIES

See the precise probability each team has of getting past round 1, reaching the Sweet 16, the Final 8, Final 4, the Championship Game and Winning it all based on the 100,000 Tournament Simulations. Which #1 Seed has the best chance of cutting down the nets? Which lower seed could 'pull a George Mason' and has the best chance of making a run to the Final 4?

WHO IS ON UPSET WATCH? WHO ARE YOUR CINDERELLA TEAMS?

In simulations every 5 Seed may win over 50% of the first round simulations. However, there is a very good chance that one of them will get upset. Identify the team from the power conference most vulnerable to an upset, the mid-major ready to show the bigger conferences what they got, or the team that started the season slow, but is now ready to go on a roll.

HIGHEST PROBABILITY BRACKET

This is the AccuScore Computer's bracket with the team winning over 50% of simulations advancing in each round.

TEAM STATISTICAL PROFILES

Identify each team's strengths and weaknesses and identify potential upsets. We focus on:

- **PACE:** The pace teams play (pts per game)
- **OFFENSIVE/DEFENSIVE EFFICIENCY:** Team FG%, Defensive FG%, Three Point %, Three Point attempts per game, Free Throw Attempts per Game. A team that shoots a high percentage from three point range and take over 20 a game may thrive in early rounds against teams that don't play great defense, but when they get into the Sweet 16 they could struggle against a team playing great perimeter defense.
- **POSSESSION MARGIN:** Rebounding margin and turnover margin determine how many shots a team gets. A bad shooting team can beat a good shooting team if they kill them on the boards or force a ton of turnovers.
- **VS. ALL TEAMS / TOURNAMENT TEAMS (TT):** See how these key statistics change when a team has played other NCAA Tournament Teams vs. all teams. Make sure your tournament favorites have performed well against the best competition and not simply posted big numbers against weaker teams.

ROUND-BY-ROUND PROBABILITIES

Out of 10,000 Simulated Tournaments this is the percent chance each team has of advancing past the 1st round, 2nd round, Sweet 16, Final 8, Final 4, Championship Game and Winning the Whole Thing.

TEAM	SEED	PERCENT CHANCE OF BEING IN					WIN

WHO IS ON UPSET WATCH? WHO ARE CINDERELLA TEAMS?

Among Top 8 Seeds the team with the lowest first round simulation winning percentage is put on UPSET watch.
Among teams with Seeds 9 to 16, the team with the winning percentage is identified as a CINDERELLA team.

SEED	EAST REGION		SOUTH REGION		MIDWEST REGION		WEST REGION
